DISCLAIMER

The Hocking County Auditor's Office, Map Department does not warrant the accuracy of our maps and data. A TAX MAP IS NOT A SURVEY but is only a representation of the property lines. The first digital tax map was created prior to having digital aerial photographs and before the older surveys on file were drawn. When new surveys are used on deeds of record the tax map is updated to match the new surveys as best we can and over time the tax map will continually be updated using the older surveys on file, so the updated areas may be close while other areas may not be accurate.

Longitude and Latitude coordinates are shown in the attribute tables of the iron pins and stones shapefiles. Said coordinates are based on the locations on the tax map and **are not the true coordinates. Do not use these coordinates as the only means to determine property corners.**

The tax map and coordinates should only be used as a resource to help find the survey monumentation (e.g. iron pins, iron pipes, corner stones, concrete monuments, etc.). If you can't locate the survey monumentation then you should hire a land surveyor to locate your property corners and lines.
